Policy on Customer Provided Items for Installation:

To ensure optimal performance and longevity of installed equipment, we require that all customer-provided items be new in the box, with the following exceptions: cot retention systems, Knox MedVaults, and Knox KeySecures. In the event that a used cot retention system is provided, it must be accompanied by a new floor plate, wiring harness, and mounting hardware to guarantee functionality and safety. Failure to provide new in the box items, as requested, may result in the equipment not being installed and returned loose with the completed vehicle.
All customer provided items must be at Frazer 60 days prior to the projected production start date. This allows us time to inventory and inspect all items prior to production beginning. Failure to provide the items on time, as requested, may result in the equipment not being installed and returned loose with the completed vehicle.
