our commitment to diversity, equity, and inclusion

When we talk about PolioPlus, we know we are eradicating polio, but we are adding many benefits. The “plus” is something else that is provided as a part of the polio eradication campaign. It might be a hand-operated tricycle or access to water. It might be additional medical treatment, bed nets, or soap. A 2010 study estimates that vitamin A drops given to children at the same time as the polio vaccine have prevented 1.25 million deaths by decreasing susceptibility to infectious diseases.
