Four responses were received for RFP#23014 for Contractors for Housing and Community Development. They were from A Quick Board Up Service, Inc. Parthy, LLC, UDH Contractors, LLC, and Votum Construction. The Selection Committee, made up of yourself, Angelia Briggs, Damaris Miranda, and Don Hoppa completely reviewed and scored the proposals. The Selection Committee then met to discuss their scoring of the responses and there was a consensus to recommend making award to all four companies and have them bid each job against one another.

Please sign below on behalf of the Committee indicating your approval to move forward with bringing this to the Commission for approval and return this memo to me. Once the City Manager signs it, I will return it to you to do the agenda memo for Commission approval.

If you have any questions, please let me know. Thanks.

Project Title: Structural Repair
and Securing Buildings

Timeframe: 5/23/1998-2023
(Current)

Contract Value: \$644,000 to date

We have had the City of Hollywood as a client for construction repairs, securing buildings/unsafe structures, and hurricane damage prevention and relief since 1998 and still retain them as a client to this day. We secured doors and windows, fenced in properties, and put measures in place to prevent vandalism to properties owned by the city. We will paint structures to the specifications of the city. With hurricanes we identify areas that are most vulnerable to damage and prioritize those first for securing structures. We then secure the necessary supplies, including plywood, screws, paint, deadbolts, framing, and tools, to properly secure the homes and buildings.

We follow very specific city guidelines and regulations to meet the specifications of our contracts. Proper materials such as high-quality plywood are installed using the recommended screw pattern and spacing. We then make sure that all windows and doors are secured with no gaps or weak spots that could compromise the integrity of the structure and use the proper paint layers and colors as per the requirements of the jobs. The jobs were completed on time and within budget and the structures were protected. We will go back to the properties and remove security measures when the city requests it such as the police department needing to access one of the structures. We also remove security measures after hurricanes at the city's request.

With regards to hurricanes we also perform landscaping work for this process including the removal of any heavy branches and unsafe trees. We cut down any objects that could become projectiles such as coconuts. Additionally bolting and securing down anything on the properties that could become a hazard with high winds. We deploy reinforcement of windows and doors, and the securing of any loose objects that could become projectiles during high winds. For particular buildings we install sandbags and barriers to prevent flooding, reinforce the roof structure, and trim trees or branches that could potentially fall and cause damage. All of these efforts aim to reduce the risk of damage to the property during a hurricane and ensure safety.

Contract Value: \$330,000 to date

We have had the City of Pompano Beach as a client for construction repairs, securing buildings/unsafe structures, and hurricane damage prevention and relief since 2002 and still retain them as a client to this day. The work involved in this role centers on protecting the properties from damage and ensuring its safety. This includes inspecting the property for potential hazards and securing any unsafe structures, such as fencing and barricades. Broken windows and sliding doors are repaired or boarded up to prevent further damage and unauthorized access. Structural and drywall repairs are made, weakened structures reinforced, and concrete slabs and pathways are poured or repaired. Additionally, general site work, landscaping, and painting are performed to improve the safety and appearance of the property. New windows or doors are installed or repaired, and stucco work is performed to restore the exterior of the property. If necessary, demolition work is performed to remove any hazardous or unsafe structures on the property. All of these tasks aim to ensure the safety of the property and its surrounding areas.

In a recent project we were required to repair the overhang of a mansard roof based on architectural drawings. We carefully removed the damaged areas of the overhang and replaced them with new materials that matched the existing design. We also reinforced the structure to ensure that it was secure and would not experience any further damage. We installed two additional footers and columns to provide extra support to a property. This was carefully planned to ensure that the new columns were positioned correctly and that the footers were properly installed. Two new footings and columns at soffit corners were added in order to provide extra structural support to the property. This required excavation of the area to install the footings and precise installation of the columns at the correct angles to provide the necessary support. We adhered to all relevant regulations and safety requirements.

In another project for the city of Pompano beach, we repaired termite damage, replaced damaged siding and roofing, and brought in subcontractors to upgrade electrical and plumbing systems. We monitored progress closely to ensure that the work was completed within budget and on time. We worked closely with the city to ensure their satisfaction with the quality of the work and that the specifications were met.

**PROPOSALS
RFP #23014 FOR GENERAL CONTRACTORS FOR
HOUSING AND COMMUNITY DEVELOPMENT**

The City of Deltona desires to obtain proposals from qualified individuals, firms and legal entities relative to providing General Contractor Services for the Housing and Community Development Programs. The City would like to develop a list of pre-qualified contractors to be contacted as needed to provide pricing for any work that needs to be done.

The Federal Government issues Grants to be administered by the City's Housing and Community Development staff. This program allows the City to purchase foreclosed properties in targeted areas and rehabilitate each of them for resale. Once the properties have been identified and purchased, the City will inspect each property to determine what repairs will be required to bring them up to code. Some of the properties may require complete demolition; therefore, the General Contractor must be able to also provide this service that includes environmental compliance within the NSP program. The General Contractor must be licensed and insured to perform work in the State of Florida and Volusia County. The Contractor will also work on SHIP and CDBG housing projects.

Construction projects will vary in size and type of rehabilitation. The contractor shall provide all plans, labor, supervision, materials, permits and equipment necessary to provide for construction or rehabilitation of a house in accordance with the specifications provided by the City of Deltona or Inspector for the Project and the Minimum Standards for Rehabilitation of Residential Properties (see attachment A), and Florida Building Codes.

NOTE: The attached Section 3 Compliance forms are required to be used by the Contractor for any new construction over \$100,000.

SCOPE OF SERVICES:

1. Perform and oversee repairs, rehabilitation and redevelopment of single family homes for the City's Housing and Community Development Program for minor repairs, repairs, rehabilitation, redevelopment or demolition of vacant or occupied homes.
2. Ensure that all sub-contractors hired to perform work are state licensed, registered in Volusia County, and insured.

4. Guarantee all workmanship, including work performed by subcontractors, for one year.
5. Provide adequate commercial general liability insurance to cover contractor and all sub-contractors.
6. Provide, to the City's satisfaction, evidence of compliance with State Worker's Compensation insurance requirements. Contractors claiming exemptions and using individual independent sub-contractors to perform work shall be subject to special scrutiny for workers' compensation compliance. Sub-contracting shall be only with State-licensed or locally registered contractors.

7. Be willing to perform only the work specified in the City's inspection report and work write-up and to work within the parameters of the NSP, CDBG or SHIP programs. This will require the Contractor to be monitoring both the work product and project accounting.
8. Agree that all communication regarding the work write-up, cost estimate, and Repair/Rehabilitation Agreement shall only be with the City's designated Housing and Community Development Division. (Communications from the homeowner concerning the Repair/Rehabilitation Agreement or any other issues shall be directed to the City's Housing and Community Development Division, as the contractor has no authority to represent the City.)
9. Agree to immediately notify the City's Housing and Community Development Administrator of any potential cost overruns found during the repair process before doing work and before making purchases that exceed estimated costs of any specific repair or redevelopment. Any fees and costs incurred for any potential cost overruns found during the repair process, without prior approval from the City in the form of a change order, shall be at risk of non-payment.
10. Agree to work with the City's Housing and Community Development Division to find value-added solutions, to find an equitable solution to any additional repairs that may be necessary before performing any work that is not specifically contained in the most recent Work Authorization/purchase order, and to perform such work only after obtaining written authorization from the City's Purchasing Department.
11. Agree to abide by all Federal, State, and Local laws and codes and, specifically, the City's Housing Program Repair and Rehabilitation Standards.
12. Be able to meet with the City's Housing and Community Development Division, as deemed necessary by the Housing and Community Development Division, to assess the progress of repairs or redevelopment and discuss any problems encountered.

Contractors interested in providing the required services shall submit proposal packages for review and evaluation by the Selection Committee. It is anticipated that two (2) or more Contractors shall be selected to provide the necessary services for a contract period of two years with the option to renew for an additional two year period upon satisfactory evaluation of the work completed on each job.

Contractors will be put into a pool of Contractors that will bid each project and award will be made either to the lowest bidder or whichever Contractors that the City determines to be in the City's best interest for each job to be fair and equitable throughout the NSP, CDBG and SHIP housing programs to all Contractors. The City reserves the right to place a cap on non-material costs that are uniform within the program that ensures that the City complies with the applicable program parameters.

**PROCEDURES TO BE USED FOR SOLICITATION, AWARD AND PROJECT
MANAGEMENT FOR CONSTRUCTION SERVICES FOR THE HOUSING AND
COMMUNITY DEVELOPMENT DIVISION**

Background:

The City's Housing and Community Development Division administers the funding for affordable housing including the home rehabilitation and redevelopment provided by the U.S. Department of Housing and Urban Development (HUD) for housing assistance through the Community Development Block Grant (CDBG), program and the State Housing Initiatives Partnership Program (SHIP) funded through the Florida Housing Finance Corporation and the Neighborhood Stabilization Program (NSP) also funded through HUD. All of these programs are designed to meet the housing needs of income-eligible households. These programs help fund the rehabilitation and redevelopment programs offered by the City to its citizens. The rehabilitation program has three components, as follows:

1. **Substantial Rehabilitation/Redevelopment of Single Family Residence** – designed to replace severely deteriorated home by demolishing the existing home and building a new home on the existing site. The replacement cost includes demolition, construction, and other associated costs to construct the new unit. **The costs are determined by bids submitted by pre-qualified building or residential construction contractors.**
2. **Rehabilitation of Single Family Residence** – designed to bring substandard owner occupied housing units up to applicable housing codes. **The costs are determined by bids submitted by pre-qualified building or residential construction contractors.**
3. **Emergency Repairs** – designed to repair owner occupied homes by correcting existing safety and health hazards, including disabled accessibility features.

In order for the citizens to qualify for this program, their home must have received at least one or more code violations that pose a health and safety issue from municipal or county code inspectors (Note: This requirement does not apply to Neighborhood Stabilization Program rehabilitation services).

All funds, other than the NSP funds, must be spent within three (3) years of the award or returned to the grantor. NSP funds must be spent within 18 months of grant award.

The City of Deltona will complete an RFP process to obtain a pool of qualified contractors to obtain bids for rehabilitation or redevelopment of single-family residence.

Process:

The City will issue an RFP to qualify contractors to participate in the Housing and Community Development rehab program. The RFP process allows competent and experienced contractors to submit their proposals to a selection committee.

The committee then determines which contractors are highly qualified based on the criteria established in the solicitation and recommends the highly qualified contractors to the City

Manager and/or City Commission for award of a basic construction contract, to remain in effect for a base period of three years. At the sole option of the City, the basic contracts may be renewed for two additional one year periods for a total term of five (5) years. Qualified contractors, however, not performing to specified standards or those who become unresponsive to bid request (s) are not recommended for renewal. Once a contractor is qualified they are then required to sign a basic contract.

Individual projects are awarded based on the single, lowest responsive and responsible bid, availability, and work volume in order to ensure timely completion of projects. Qualified contractors are awarded no more than three (3) projects at any given time; however, the Housing and Community Development Division has the discretion of awarding more than three (3) projects, if deemed appropriate. The City Manager or designee will be the authority to sign work authorizations within the program budget. Authorization for performance of services under the contract are in the form of a formal written work order and purchase order signed by the contractor, issued by the City's Purchasing Division.

Procedure:

Step 1: Once the home(s) to receive rehabilitation are identified, the Inspector will indicate on Work Write Up (Scope of Work) form what needs to be completed. The pre-qualified Contractors will be notified of a pre-meeting at the residence at which time they will meet with the Inspector and/or the homeowner.

Step 2: The Contractor will provide their price based on the Work Write Up and their PRICE SHEET and any additional work required. The Work Write Up will have the day, time and location that bids are due.

Note: Qualified Contractors are those eligible to submit a formal written bid based on current workload and when it is advantageous for the City to receive their bid.

If there are any significant changes to the Scope of Work, an addenda will be issued and bids will include any changes made in the addenda.

Step 3: After receipt and review of bids received, a recommendation of award will be issued to the Housing and Community Development Division will send it to Purchasing along with a requisition for the Contractor to begin the work. The notification to all qualified contractors, all bids submitted including the executed formal written bid, tabulation sheet, and the specifications and any addenda shall be attached to the PDQ.

Step 4: Step 5: Purchasing receives and reviews the Purchase Requisition ensure that all documentation is included.

Step 8: After review of the Purchase Requisition and related documents, Purchasing then electronically routes the purchase order through the appropriate approval process.

Step 9: Purchasing then sends to the contractor an executed work order along with the purchase order.

Step 10: The Housing and Community Development Division will notice the homeowner (unless it is a NSP project) letting them know who was awarded the work and when arranges a pre-construction meeting and issues a Notice to Proceed for the project. The Housing and Community Development Division will advise the homeowner if or when they need to temporary relocate.

Change Orders: If any changes (scope of work, monetary or time related) arise due to unforeseen circumstances, a written change order request form, on the approved Purchasing Change Order Form, shall be immediately submitted to Purchasing prior to proceeding with the work.

Project Closeout: At project completion, the Housing and Community Development Division shall prepare the closeout documentation which includes a score/grade card of the contractor's performance, pictures taken before and after the project, and a final acceptance document signed by the Housing and Community Development Division, the contractor, and the homeowner. The annual or semi-annual reports shall be based on this information.

Goals:

1. Expend the budgeted funds authorized for this program within the time constraints set forth in the grant guidelines;
2. Construct or repair homes to promote affordable housing; and
3. Streamline the procurement process to become more efficient and effective in order to reduce time and save taxpayer money.

DELAYS

UDH Contractors, LLC has never failed to complete a project.

Due to external conditions brought on by COVID, many projects have been faced with longer than normal material lead times. We were able to narrow the project completion dates for many renovation projects by sourcing and securing longer lead time products prior to commencing work. This allowed less disruption for our clients and a more seamless project.

Subject: RFP #23014 General Contractor Services for Housing and Community Development

Dear Members of the Selection Committee:

We appreciate this opportunity to submit our qualifications to illustrate our capabilities, and express our commitment and enthusiasm to provide General Contractor Services for Housing and Community Development to the City of Deltona. We have assembled a team that will bring a wide range of experience and value to the City for this particular program. Votum Construction and Cely Consulting (hereafter referred as Votum/Cely) are the collaboration of two firms, who combine their staff and resources to expand their capabilities. Votum/Cely is not a joint venture but are teaming in a relationship. The Contracting Entity would be Votum Construction. Both firms operate in the same facility and share the same philosophy, that *excellence in the performance of our services is what will bring repeat clients and distinguish us in the marketplace.*

Votum/Cely has successfully demonstrated that it is a trusted and reliable professional service provider and partner. For the past thirteen plus years, Votum and Cely have provided the required services in this RFP across five States in the South and over ten Counties in Florida. Our staff of highly trained construction management experts are well-qualified to provide rehabilitation and redevelopment of single-family homes to include but not limited to internal and external repairs, minor repairs, demolition, rehabilitation, among many other scopes of work. Our team's qualifications and experience are further explained in more detail in this RFP.

As our proposal is evaluated, we would like the selection committee to take into account the following added value we believe Votum/Cely will bring to this program.

Strength of proposed team: Each of our proposed experts bring significant past relevant experience and knowledge of housing and community rehabilitation/redevelopment. Our leadership, financial strength, and responsible business practices provide us the enduring capacity to perform these services.

Experience with Federal Funded Projects: We have built a solid reputation for performing on General Contracting projects and working with cities on projects that involve federal grants. We have experience managing federal-funded projects. We understand that each source of funding has its own usage, procedures, and specific timelines. Our team is committed to follow these requirements effectively and bring the project to completion by meeting and exceeding our client's needs and expectations.

Timely Delivery within Budget and Highest Quality: These two areas are essential during every stage of the project. We believe that quality is the ultimate measure of success, and this means providing excellence in service will lead us to complete the project as scheduled and within budget. We work safely in occupied spaces, taking in consideration the safety and respect of others. Our relationship with vendors and subcontractors and current knowledge of the construction market enables us to provide the best prices and timely delivery of materials/equipment, and ultimately and most importantly, complete the project on time and within budget.

Letter of Interest

Communication and Responsiveness: We always emphasize the importance of communication with our team. We have trained our staff to first understand the requirements of the project and the expectations of our clients before we take any further action. When there is an effective line of communication, any potential issues may be avoided or resolved as efficiently as possible. In order to accomplish this, we plan for frequent meetings with our clients to ensure they are satisfied with the progress of the project and our performance. We also plan regular meetings with our subcontractors to consistently communicate the requirements and standards of the project.

Standards and Ethics: Votum/Cely values relationships with the people we serve - our clients, other contractors, subcontractors, staff and associates. Together, we can enhance the quality of life for all. Since we believe that buildings are the reflection of the people who build them, we hire leaders of esteemed character who are fair, kind, and considerate. By attracting and retaining the best professionals in our industry, we are able to maintain the highest standards and ethics.

We strongly believe our proposed team will deliver on all the requirements of this RFP. We look forward to the opportunity to serve the City of Deltona as General Contractor for the Housing and Community Development Program.

Respectfully submitted,
