Hi Mark,

Sorry it's taken time for me to get back to you on this, but I had to get information outside of our division. Per our ROW section's review and discussion with Storm and also Tadd's direction, until FDOT's I-4 Beyond the Ultimate construction is finished, we don't wish to see the vacation of the 15' ROW. If you need to discuss this further, please reach out to Storm.

Melissa

Melissa,

Thanks for the call earlier. Attached is the parcel map and proposed layout of the project we are working on. Just trying to verify if the County anticipates needing any additional ROW between the parcels and Howland. Ideally, we want to get the City to vacate the 15' driveway noted on the attached site plan, but the City wants to make sure the County does not need additional ROW beyond what it appears to have. Please let me know what you think. Thanks!
