545 **Sec. 110-313. OR, Office Residential Zoning District.**

- 546 (a) *Purpose and intent.* The purpose of the OR, Office Residential Zoning District is to meet
 547 two objectives. First, the district is intended to be established in single-family residential
 548 areas where road expansions and/or high traffic volumes, nearby nonresidential
 549 development, and existing or developing nuisances (noise, lights, vibrations, etc.) decrease
 550 or potentially diminish the future potential for the continued use of the area for single-
 551 family residential purposes. Second, the OR District is intended to be established as a buffer
 552 between existing or proposed single-family residential development and existing or
 553 proposed commercial development and high traffic volume streets, and other nuisance
 554 producing areas. Designation of an area as an OR zoning district recognizes that the area is
 555 a transitioning commercial area, as referenced in the adopted Deltona Comprehensive Plan,
 556 as it may be amended from time to time.
- 557 (b) *Permitted uses.* In the Office Residential Zoning District, no land, building, structure, or

582 **Sec. 110-314. PB, Professional Business Zoning District.**

- 583 (a) *Purpose and intent.* The purpose of the PB, Professional Business Zoning District is to
584 establish a transitional zone between high volume streets and single-family residential areas,
585 and between higher intensity development and single-family residential areas. The

586 Professional Business Zoning District is established in areas that are transitional in
 587 character. Therefore, a mix of single-family and compatible office development, with some
 588 retail sales, is permitted. The Professional Business (PB) Zoning District was first
 589 established in the original Deltona Lakes Community Development Plan to serve this
 590 purpose in the planned development. It may be applied to achieve a zoning transition in all

626 development with no residential mix is permitted. The C-1-Retail Commercial Zoning
627 District was first established in the original Deltona Lakes Community Development Plan to
628 serve this purpose in the planned development. It may be applied to achieve a commercial
629 development suitable for serving surrounding single-family residential development in all
630 other appropriate areas of the City, including those areas that were not included in the
631 original Deltona Lakes Community Development Plan. The C-1 Zoning District shall only

⁽⁴⁾ In the activity center, buildings having a height over 55 feet shall provide perimeter landscaping and visual screening that is 50 percent higher both at the time of planting and within three years than the minimum height requirements of Article VIII, Section 110-808, Landscaping requirements.	
⁽⁵⁾ Swimming pools and screened enclosures are excepted from this provision.

 725 Activity Center.

726 (f) *Final Site Plan requirements.* Final Site Plan approval meeting the requirements of article

749 **Sec. 110-320. EO, Enterprise Commercial Overlay District.**

750 (a) *Purpose.* Gateway corridors serve as primary entrances to the City. The Enterprise
751 community has recognized historical significance. The purpose of this Section is to ensure
752 the design of non-residential sites, landscaping, site appurtenances, and building
753 architecture at the gateways to Deltona and Enterprise along Doyle Road, DeBary Avenue,
754 and Enterprise Road near and within the Enterprise Community is consistent with the
755 historical character of Enterprise. Gateway areas are the area within a one-quarter-mile
756 radius of the intersection of I-4 and DeBary Avenue, and the area within a one-quarter-mile
757 radius of the intersection of Providence Boulevard with Doyle Road/DeBary Avenue.

758 (b) *Basis guidelines, elevated guidelines, and applicability.* Basis guidelines consist of existing,
759 or hereafter amended, development guidelines presently contained in the City Code of
760 Ordinances and/or Land Development Regulations.

761 Elevated guidelines consist of development guidelines hereafter set forth in Sections 110-
762 320(c) and 110-320(d). In case of a conflict in the applicability of guidelines, the most
763 stringent and restrictive shall apply.

764 (c) *Elevated architectural guidelines.*

765 (1) *Applicability.* The architectural guidelines shall apply to all new development and
766 redevelopment within the Enterprise area, and gateways to both Deltona and the
767 Enterprise community, except for additions, renovations, replacement or
768 redevelopment of an existing structure or project, where the cost of such additions,
769 renovations, replacement or redevelopment does not exceed 50 percent of the value of
770 the existing structure(s), or 35 percent of the square footage of the existing structure(s),
771 unless the use of the structure(s) or project has ceased for a period of more than 365
772 consecutive days, or unless cumulative additions, renovations, replacement or
773 redevelopment initiated during any five-year period meet the thresholds listed above,
774 whereupon the provisions herein shall apply.

775 (2) *Submittal and approval requirements.* The architectural guidelines shall be monitored
776 and enforced by the City. All development proposals shall be submitted to the City for
777 approval in accordance with all applicable laws, rules, and Ordinances. No
778 development proposal shall be submitted to the City that does not comply with all
779 applicable requirements. Deviations from these requirements shall require a variance
780 approved by the City Commission in accordance with the Ordinance procedures and
781 standards for zoning variance.

782 (3) *Elevated guidelines (appearance criteria).* Compliance with the intent, guidelines and
783 provisions of this ordinance shall be as provided for below:

784 a. *Architectural style and application.* It is the intent of this ordinance to ensure a
785 harmonious streetscape and compatibility between structures within the Enterprise
786 Road/Doyle Road/DeBary Avenue corridors, and at the Deltona/Enterprise
787 gateways at the intersections of Deltona Boulevard and DeBary Avenue and
788 Providence Boulevard with Doyle Road and DeBary Avenue, sympathetic and
789 respectful of commercial structures in and around Enterprise, which will serve as
790 a guide for the aesthetic of new development. The styles that accomplish this are

791 the Florida Cracker, a subset of the Florida Vernacular, and the Florida Victorian.
792 (Examples of Interpretation, Figure 1.)

- 793 1. Structures shall reflect similar styles, materials, details, and colors.
- 794 2. In the, the following guidelines shall be implemented for new structures and
795 renovations.
- 796 3. All construction shall conform in street orientation and massing to pre-
797 approved site plan.

798 b. *Building mass.*

- 799 1. For structures less than 5,000 square feet in gross building area on the
800 ground floor, no uninterrupted horizontal length of a building facade shall
801 exceed 20 linear feet.
- 802 2. For structures greater than 5,000 square feet in gross building area on the
803 ground floor, no uninterrupted horizontal length of a building facade,
804 (defined as the front of a building), shall exceed 35 linear feet.
- 805 3. Blank wall areas for each floor-to-floor relationship (those without relief or
806 uninterrupted) shall incorporate the use of landscaping to break up the
807 monolithic appearance of such areas. Blank wall areas uninterrupted by
808 landscaping shall not exceed ten feet in vertical direction or 20 feet in
809 horizontal direction of any building facade.
- 810 4. Elements acceptable for the interruption of blank wall surfaces are belt
811 courses, trim bands, and related horizontal and vertical recessed and
812 protruding elements.
- 813 5. For structures where verandahs, (defined as a usually roofed open porch on
814 the exterior of the building), have been included, a change from grade to
815 finish floor of structure of 12 inches will be included in the design.

816 c. *Design detail.* Buildings shall be designed to enhance the attractiveness of the
817 City's streetscape. Buildings shall, through use of architectural details and scale,
818 have architectural features and patterns that provide visual interest from the
819 perspective of the pedestrian and the motorist. The following techniques shall be
820 incorporated into building design in order to accomplish such requirements (see
821 Illustration No. 2):

- 822 1. All buildings shall be required to provide the following exterior design
823 elements:
 - 824 a) Canopies or porticos, integrated with, and responsive to, building
825 massing and style at entryways—see 1.1.3.3(D).
 - 826 b) Trim elements of appropriate materials and profiles at entries and
827 fenestration.
- 828 2. Building elevation configurations and techniques: For structures greater than
829 5,000 square feet in gross building area on the ground floor, eaves, cornices,

830 facades shall include detailing, (i.e., raised access bands, cap elements, etc.),
831 emphasizing horizontal lines.

832 3. Windows (may be active or fixed) shall be placed along at least 50 percent of
833 any facade that is visible from a public right-of-way. Windows shall be
834 recessed (set to the inside of the building face wall) and shall include
835 prominent sills and some form of framing or trim as outlined below.
836 (Examples of Interpretation, Figure 2)

837 a) Windows at street level elevation shall be un-tinted.

838 b) Windows shall be of square, vertical proportion, or horizontal.

839 c) Windows shall be divided lite (true or simulated). Picture pane and
840 storefront glazing will not be allowed.

841 • Simulated division of windows requires full profile muntin's, (defined
842 as the strip separating panes of glass in a sash).

843 • Windows immediately adjacent to commercial entrances shall have a
844 sill height of between 12" and 36" above finish floor.

845 • No window on any facade shall be lower than 12" above finish floor.

846 d) One accent window with decorative glass per building facade may
847 be circular or hexagonal. Additionally, each facade of a cupola or
848 entry tower may act as a facade for this window type, i.e., a six-
849 sided cupola may have six accent windows of circular or hexagonal
850 shape.

851 e) Windows in stucco or wood facades shall have molded or squared
852 casings, respectively, keeping with the architectural style of the
853 structure.

854 f) Windows in brick facades shall be trimmed with brick moldings
855 but not cased. Windows in brick facades shall have either brick
856 jack or segmented arches and classic brick sills, preferably a
857 molded shape, not rowlock or headers.

858 g) Palladian semi-circular window arches are not allowed.

859 h) Retail frontages, which require storefront styled window areas, can
860 use exposed steel, or aluminum clad in wood.

861 d. *Entryways/customer entrance design.* Entryways shall be designed to provide
862 project focal points. Entryways shall be designed in accordance with the
863 techniques listed below. In the event that the entryway is not oriented toward the
864 major road that, as determined by the City, provides access to the building, the
865 side of the building facing such road shall also be designed to comply with item a.
866 below.

867 1. Entryways shall be differentiated from the remainder of the facade through at
868 minimum the use of color, change in materials, application of architectural

869 features (arches, columns, colonnades, etc.), setbacks, offsets, level changes
870 and the like.

871 2. Entryway design shall incorporate landscaping, landscape planters or wing
872 walls with landscaped areas.

873 3. Entryway areas shall be provided with structural or vegetative shading
874 features and benches or other seating components.

875 e. *Building orientation.* Buildings shall be oriented so as to enhance the appearance
876 of the City's streetscape. This requirement shall be met by incorporating the
877 following techniques into project design and shall be approved in site plan
878 development review.

879 1. Buildings shall be designed and oriented, so the entrance is visible from the
880 public road from which driveway access is provided.

881 2. Either each the building's primary facade shall face parallel to the public road
882 from which driveway access is provided, or each facade, which is clearly
883 visible from a public right-of-way, or public area of adjoining properties
884 shall be designed with full architectural treatment.

885 3. Building orientation shall be such that service areas are placed out of view
886 from public rights-of-way, parking areas and adjacent properties. Structural
887 screening and/or landscape screening to comply with these guidelines shall
888 be used to visually encapsulate service areas.

889 f. *Exterior materials and colors.* Exterior building materials and colors contribute
890 significantly to the visual impact of a building on a community, which, in turn,
891 individually and collectively reflect upon the visual character and quality of a
892 community. In order to project an image of high-quality City aesthetics, building
893 materials and colors shall conform to the following requirements (Examples of
894 Interpretation, Figure 3):

895 1. All buildings shall be faced with materials that exhibit a durable, high-
896 quality appearance.

897 2. Materials shall be of a low maintenance type, retaining a consistent, clean
898 appearance.

899 3. Generally accepted exterior facing materials shall relate to the mass of the
900 structure and be prioritized in their use based on square footage as follow:

901 a) For structures less than 5,000 square feet in gross building area on
902 the ground floor acceptable materials shall include on all facades
903 that are or will be exposed to the general public:

904 (1) Brick.

905 (2) Cellulose fiber-reinforced cement building boards.

906 (3) Stone.

907 (4) Stucco, if used shall be flat finish or sand finish..

908 (5) Wood

- 909 b) For structures greater than 5,000 square feet in a gross building
910 area on the ground floor acceptable materials shall include on all
911 facades that are or will be exposed to the general public:
- 912 (1) Brick.
913 (2) Cellulose fiber-reinforced cement building boards.
914 (3) Stone may be used at foundations and structural pier
915 locations.
916 (4) Stucco, if used shall be flat finish or sand finish.
917 (5) Wood.
- 918 c) Two wall materials may be combined on any facade, up to all four
919 facades, horizontally. The visually heavier facade material must be
920 below and can cover the first third of the overall wall height only.
- 921 4. Exterior colors shall not be specifically limited but shall be consistent with
922 historically appropriate tones and hues, as is consistent with paint
923 manufacturer's produced palettes of historic colors and combinations on file
924 with City staff. Variation from established combinations should be
925 discouraged. Corporate colors not included on historic palettes, shall be
926 limited to logo signage only.
- 927 5. Building materials and colors shall be consistent around the entire building.
928 6. Metal building structures are acceptable if clad in the approved materials as
929 outlined above.
- 930 g. *Reserved.*
- 931 h. *Roof design and materials.* Roof features shall be in scale with the building's mass
932 and complement the character of the structure, developments, and neighborhoods.
933 Roofs shall be constructed of durable, high-quality materials in order to enhance
934 the appearance and attractiveness of the community. Roofs shall incorporate the
935 design elements and materials listed below: (Examples of Interpretation, Figure
936 4).
- 937 1. For structures less than 5,000 square feet in gross building area on the
938 ground floor the design of roof structures shall be of flat, hip, or gable. If
939 roof surface is visible, hipped, or gabled, the material shall be metal standing
940 seam or "V" crimp.
- 941 2. For structures greater than 5,000 square feet in gross building area on the
942 ground floor the design of roof structures shall be flat with parapet wall. The
943 parapet wall and cornice shall include decorative caps and brackets that do
944 not act as waterproofing elements.
- 945 3. Parapets when provided will be broken with a minimum of one-stepped
946 pediment articulated with a centered entry below or no more than two per 50'
947 of length centered on a main entry below and centered over side windows.

- 948 4. Roof-like appurtenances such as false roofs, parapets and other similar
949 features may be allowed if, such features are required for mechanical
950 equipment screening or acoustical control that cannot be accomplished
951 through utilization of approved roof styles. Application of such-roof like
952 features shall be accomplished in such a manner as to minimize the
953 appearance of a flat roof design.
- 954 5. Roofs shall be designed to be of such height, bulk, and mass so as to appear
955 structural even when the design is non-structural.
- 956 6. Cupolas shall only be included on roof structures when windows are for
957 natural light illumination of a space beyond or through louver venting of an
958 attic volume.
- 959 7. If the use of a flat roof is desired, the exterior of the building shall be clad in
960 brick or stucco.
- 961 i. *Fence and wall design.* Design and construction quality of fences and non-
962 building walls are important visual reflections of community character and
963 quality. In order to promote quality site aesthetics, fence and wall design and
964 construction shall comply with the following requirements:
- 965 1. Fences and walls, whether required for project approval or whether
966 incorporated into overall project design, shall be designed as an integral part
967 of the principal structure(s). Such design shall include the use of similar
968 materials, colors and finishes as the principal structure.
- 969 2. Fences and walls shall be architecturally designed with offsets, raised
970 elements and landscape pockets to avoid an expansive monolithic
971 appearance.
- 972 3. Chain link fencing, plastic fencing panels, and vinyl fencing is not permitted.
- 973 j. *Perimeter planting.* Plantings located around the perimeter of buildings enhance
974 site aesthetics and increase green space. All projects shall incorporate perimeter
975 plantings into project design in accordance with the requirements listed below:
- 976 1. This section supplements and does not supersede the City Landscaping Code
977 requirements. All minimum requirements of the City Landscaping Code
978 must be met, notwithstanding anything to the contrary that may be contained
979 in this Section.
- 980 2. Perimeter landscape plantings shall be located adjacent to the primary
981 facade(s) and along any blank facade wall areas that are, or will be, exposed
982 to the general public. Such plantings shall also be included at entrance areas,
983 plazas, and courtyards.
- 984 3. Perimeter landscaping shall consist of a combination of trees, palms, shrubs,
985 and ground covers. Planting material type, size and spacing shall, at a
986 minimum, be consistent with the requirements of the City's tree and
987 landscape ordinance.

- k. *Screening of mechanical equipment.* Lack of, or inadequate screening of, mechanical equipment can have negative visual impacts on the City's streetscape, ambient landscape, or community image. Such impacts shall be minimized through compliance with the following requirements:
 - 1. Mechanical equipment located on the ground, such as air conditioning units, heating units, satellite dishes, irrigation pumps, propane tank displays and refilling areas, utilities lift stations, and the like shall be screened from public view. Screening shall, at a minimum, be at the same height as the equipment. Structural screening shall be architecturally integrated into the overall project design and shall be compatible, in terms of style, construction materials, colors, and finish, with the principal structure(s). Landscaping may be substituted for structural screening if plantings are compatible with the landscape plan for the project and are of such size and maturity as to be able to provide a fully opaque screen at time of planting.
 - 2. Equipment and appurtenances mounted on rooftops shall be kept to a minimum. All exposed rooftop mounted equipment and appurtenances shall be fully screened from view from any public right-of-way. All screening shall, at a minimum, be at the same height as the equipment and appurtenances. Screening shall be an integral part of the design of the building(s) and shall be architecturally consistent with the style, colors, construction materials and finish of the building(s).
- l. *Lighting.* Lighting fixture design and placement are important components of an attractive urban environment as well as important to public safety. In order to enhance site aesthetics and minimize visual distraction, yet maintain adequate public safety, project lighting shall comply with the requirements listed below:
 - 1. An exterior building and site lighting master plan detailing areas and structures requiring illumination, lighting fixture styles, light source and light levels shall be included as part of a project's submittal for approval.
 - 2. Recessed lighting fixtures shall be required in order to conceal the actual light source, reduce glare, and direct light to specific areas while shielding other areas.
 - 3. Lighting of parking areas, access drives and vehicular circulation areas shall follow LDC Section 110-828.
 - 4. Neon lighting and fiber optic lighting, signs, or company logos/slogans, or neon or fiber optic lighting of any use is not permitted.
 - 5. Building illumination and architectural lighting shall be indirect and with no visible light source.
 - 6. Ground level light fixtures shall be of the burial vault type or shall be fully screened by landscaping materials.
 - 7. Lighting fixtures will not create ambient lighting or trespassing lighting scenarios.

- 1029 m. *Utilities.* The location and aesthetic treatment of utilities is an important factor in
1030 creating an attractive urban environment. In order to enhance and maintain the
1031 image of quality in the urban environment, utilities construction and placement
1032 shall comply with the following requirements:
- 1033 1. All utility lines, whether new or relocated, shall be installed underground.
 - 1034 2. Utility conduit and utility panels/boxes shall be painted to match the color of
1035 the building on which they are placed. Additionally, panels/boxes shall be
1036 located on the same facade considered the service side or entrance.
 - 1037 3. Water and sewer lift stations, pump houses and similar features shall be
1038 located at the rear of the project site and shall be fully screened from view by
1039 structural or vegetative means. Where screening is accomplished structural
1040 means, such screening shall be compatible in design and color with the main
1041 building.
- 1042 n. *Outdoor storage.* Outdoor storage areas are not permitted.
- 1043 o. *Accessory uses and structures.* Structures and uses accessory to principle
1044 structures and uses shall be integrated into project design in a manner such that
1045 they will not detract from site aesthetics. Such structures and uses shall comply
1046 with the requirements listed below:
- 1047 1. Accessory structures shall be designed and constructed so as to be
1048 compatible, (i.e., similar in style and image), with the architectural design of
1049 the principal structure(s). Exterior finishes, colors and materials on accessory
1050 structures shall be similar to those used on the principal structure(s).
 - 1051 2. Outdoor display and sales areas are not permitted.
 - 1052 3. Site furnishings such as benches, bicycle racks, newspaper racks, trash
1053 receptacles and the like shall be compatible with the architectural design of
1054 the principal structure. Permanent shopping cart storage shall be contained
1055 within the principal structure. Any site furnishings as listed above will be
1056 painted black, so as to blend in with the existing landscape and environment.
 - 1057 4. Except for cellular and other communications towers and antennas that shall
1058 be regulated pursuant to Chapter 82 of the Code of Ordinances, as it may be
1059 amended from time to time, no accessory wireless communications towers or
1060 antennas are permitted within these guidelines for the Enterprise Commercial
1061 Overlay District to be ground mounted, (i.e., placed on concrete pads with
1062 appropriate anchoring systems on grade). Dishes and antennas required for
1063 the operation of the principal business will be located on a roof structure and
1064 will not be visible from the R.O.W. Such placements shall comply with the
1065 following requirements:
 - 1066 a) For facilities mounted on an existing or new building, the tower,
1067 and antenna must be of a color that is identical to, or closely
1068 compatible with, the color of the building so as to make them as

1088 given area. The applicant shall submit the following
1089 documentation:
- 1090 (i) Colorized pictorial representation, artist rendering, or

1098 environment, building heights and design, and how the
1099 proposed camouflaging and/or concealment agent(s) will
1100 blend in and harmonize with the nature and character of the
1101 area.
